Subject: San Jacinto River Dioxins

I got a "go box" last night from Fratellis Restaurant to bring home the leftovers from my delicious pasta:

Linguini al Frutti di Mare – Handmade 17.95
*tagliatelle with shrimp, caalamari, baby clams,
 black olives, green onions, garlic & olive oil*

Imagine my disappointment and alarm reading the Houston Chronicle's Sunday morning graphic historical depiction of your EPA effort to protect my health. Do you really think a tarp secured by rocks will prevent tidal flows and surges from carrying dioxin into our estuary?

I retired to Houston after a quarter century of teaching at Lamar University and Lamar State College Beaumont/Port Arthur, so I know the power and influence of Waste Management. But really now? Can't you folks do better than this. All in my household have fought cancer and are "winning" so far. Just lucky I guess. No thanks to you I'm sure.
